## WATCH

works for an inclusive Church, responsive to God's will and trusting in God's ways

## WATCH

wants to see women taking their place alongside men at every level in the Church, and to help the Church become the community of equals which Jesus calls us to be

### **Our work is shaped by these priorities:**

- the appointment of women at all levels in the Church, in particular women in the Episcopacy
- honesty and openness in all appointments
- better support for women in ministry, and for all those who suffer because of their advocacy of women's ministries

*These aims are to be pursued in co-operation with other denominations and other organisations, where appropriate.*
